

To Remove Complete Android Studio from Windows.

### Step 1 :(Run the uninstaller)

The first step is to run the uninstaller. Open **Control Panel** by accessing it from the menu when you right-click the Start Button (This applies for Windows 8 systems). Then, under **Programs**, select **Uninstall a Program**. After that, click on `Android Studio` and press **Uninstall**. If you have multiple versions, uninstall them as well.

### Step : 2(Remove the Android Studio files)

To delete any remains of Android Studio setting files, in Windows Explorer (The file browser in Windows), type this as the **File Path**:

```
C:\Users\Ironman
```

**Note** : Here Ironman is my Windows Username

go to that path and delete `.android`, `.AndroidStudio` and any versions of this directory with versions on the end, `.gradle` and `.m2`

then go to **C:\Users\Ironman\AppData\Roaming**

and delete the JetBrains directory.

Finally, go to

#### C:\Program Files

and delete the Android directory.

### Step 3 : (Remove SDK)

To delete any remains of the SDK, in Windows Explorer, type this in as the File Path:

```
C:\Users\Ironman\AppData\Local
```

Here, delete the Android directory.

### Step : 4(Delete Android Studio Project)

Android Studio create project in `C:\Users\Ironman` with folder `AndroidStudioProjects` delete that.

This way you can Complete uninstall Android Studio from Windows.
